## Project Title: Sunfish Website

I'd like to build this website as multiple pages, navigable by a series of tabs along the top. I feel as if there is too much content to be shown on a single page as it would get very cumbersome to scroll down.

- **Home page** - General information about the sunfish
- **Description**
- **Range and Behavior**
- **Human Interaction**
- **In Captivity**
- **Sources** - Page links back to Wikipedia article and image sources
